

The King of Indexing is causing confusion

So what's the better choice?

- Buying a low cost index fund.
- Hiring a professional manage your money and help with planning.

In today's podcast we use Jack Bogle, the King of Indexing, own words and research to help us answer this very question.

For anyone that is bombarded with the endless "low cost" marketing, this podcast is for you!

We also address the market. We are in a trading range 8 – 10% below the highs of January. In this market, good news is bad news, bad news is bad news and the 10-year Treasury hitting 3% is the end of the world. Should you be worried? (short answer is no!)

Enjoy this weeks podcast!

Here's to wise investing,
